The **Master's program in Applied Physics & Nanotechnology** is a hands-on, industry-oriented program designed to train students in sought after skill sets including

- Nano- and Micro-fabrication
- Lithography
- Device & Sample Characterization
- Computations

Admissions Criteria

- BS in any science, mathematics, engineering, or technical discipline
- GPA & GRE Scores
- Professional Experience
- Letters of Recommendation

Financial Aid

Tuition Discounts & Scholarships Available to Selected Students
